

LYNX Plus Security System

INFORMATION FOR DEALERS

**Connect to Opportunity
with LYNX Plus**

Honeywell

LYNX, Plus a Whole Lot More

The Advanced Security and Communications Solution

Honeywell's LYNX Plus is easy to sell, simple to install and provides you with many opportunities to increase your recurring monthly revenue (RMR)—even when no phone lines are available.

Close More Business

LYNX Plus has features your customers will appreciate, including:

- Smaller, sleeker design
- 4G alarm communications to increase speed, increase account longevity and provide the best coverage
- Thermostat and basic lighting control via Z-Wave® Bridge
- Easy to read two-line by 16-character backlit display that describes system status and zone information
- Voice announcements of system status or alarm conditions
- Doubles as a speaker phone and voice message center

Save Money

LYNX Plus reduces your installation costs with:

- Hinged cover that reduces installation time and simplifies wiring
- GSM radio with built-in antenna that quickly installs in the back case
- GSM signal strength indicator on the display that helps installers to easily find the best installation location
- Keypad-initiated GSM radio registration that enables installers to register the radio without opening the case
- Programming prompts displayed in plain English that reduce training time for new installers
- One hardwired zone for applications and reduced material costs

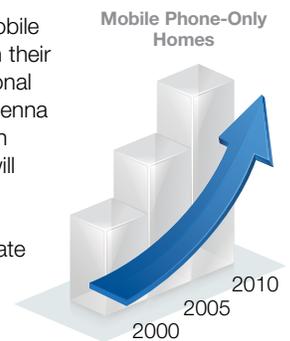

Increase RMR

LYNX Plus supports services customers value and are willing to pay for, including:

- Built-in two-way voice
- Two-way voice over GSM for the growing number of mobile phone-only homes
- Honeywell Total Connect™ Remote Services, which lets them control their security systems, view video and receive real-time alerts about events in and around their home from any remote location

Make More Money on Every Sale!

20% of homes in North America are mobile phone-only.* What are you doing to win their business? LYNX Plus supports an optional integrated GSM radio with a built-in antenna that you can place virtually anywhere on the premises and know alarm signals will get through. It also offers the first ever two-way voice solution over GSM...a powerful combination that will differentiate your business, drive more sales and grow your RMR.

1 Quick Voice Prompt Programming

Voice prompt programming enables installers to program the system with little or no training.

2 Full Voice Response

LYNX Plus speaks to your customers in plain English, indicating system status and zone descriptions.

3 Scheduling

LYNX Plus can be used to schedule events and reminders and turn lights on or off at specified times. It can even be used as a convenient alarm clock.

4 Family Message Center with Built-in Microphone

LYNX Plus opens the lines of communication, allowing family members to record and playback brief messages and reminders for each other.

5 Single-button Operation

LYNX Plus is so hassle-free that your customers are able to arm their system with a single button without having to enter a code.

6 "Follow Me" Alarm and Reminder Announcements

This valuable feature alerts homeowners to alarms and important reminders (e.g., taking medicine, etc.).

7 Lack of Usage Notification

The system notifies the central station if the security system is not armed or disarmed within a programmable time.

8 2 x 16 Custom Alpha Backlit Display

The vibrant, easy-to-read, Custom Alpha Display provides your customers with greater awareness by spelling out the exact type and location of an alarm in plain English so they can react quickly.

9 Remote Phone Control

LYNX Plus keeps your customers connected by allowing them to remotely operate their security system from any touchtone telephone—from their car, office, or anywhere in the world! It can also be used as a convenient, hands-free speakerphone.

10 Full-function 16-Button Keypad

Puts a wide range of security and convenience features at your customer's fingertips.

11 Built-in Wireless Receiver

Supports the proven line of 5800 Series wireless devices, including remote controls with status feedback.

12 Built-in 85 dB Sounder with Voice Siren

13 Two-way Voice

Integrated two-way voice means central station operators can listen in and talk to the homeowner when a signal is received, reducing the risk of false alarms.

14 Optional GSM Radio

Includes internal antenna and two-way voice support.

15 Energy Management

Offer thermostat setback and basic lighting control to your customers via optional Energy Management Module.

16 APL (Advanced Protection Logic)

A signal can be sent to the central station even if an intruder attempts to destroy or disable the control panel in a "smash and grab" attack.

Honeywell Total Connect™ Remote Services

Increase your RMR, close more business and reduce attrition when combining LYNX Plus with Honeywell Total Connect. Your customers can access and operate their systems remotely, view live video, receive important alerts and stay connected to their homes and families on the same mobile devices they use every day.

Honeywell Total Connect contains an interactive dashboard, dynamic flash-based graphics and more. Everything your customers need to control and manage their systems is viewable at a glance. They can even set up and manage their own accounts and control their cameras—making life easier for them and for you.

- Arms end-users with the information they need instantly, letting them decide what action to take
- Your customers can receive email alerts if a protected asset is moved, flood or extreme temperature is detected or movement is sensed in a specified indoor or outdoor area
- Industry exclusive – remote keypad emulation and real time “live connection” with the panel
- End-users can view live video on up to six cameras at a time and have video clips or pictures emailed to them upon an event
- Optional energy management and lighting control
- Multiple account capability—great for customers with vacation homes and investment properties
- Free apps available*

*Free apps available for Apple® iPhone®, iPad® and iPod touch® and Android™ devices. iPhone and iPad apps are available at Apple's iTunes store. Android app available in the Google Play Store.
